

See the bigger emissions picture

Emissions reporting from Sawatch Labs, brought to you by WEX

Built for ICE fleets that need to stay compliant

Even if electric vehicles aren't on your roadmap, tracking emissions is fast becoming essential.

Whether it's about meeting regulations or just keeping on top of your fleet's environmental impact, our EMIT reporting software **developed by our partners at Sawatch Labs**, offers a straightforward, reliable way to stay in control. It captures your vehicle data in one place, so you can focus less on admin and more on what matters.

A smarter way to stay compliant

EMIT takes the guesswork out of emissions reporting. With automated monthly reports and real-time insights across your fleet, you get the clarity you need to stay compliant and plan for what's next.

It brings together all your vehicles into one central view, offering practical insights and ready-to-submit reports.

Easy-to-use dashboard

Understand key emissions trends, even within a fully ICE fleet.

Track emissions with precision

See what your fleet is emitting – across every vehicle and trip.

Automated compliance reports

Monthly reports delivered without the manual effort. Stay audit-ready and up to date.

Simple to integrate. Ready to go.

EMIT works with your existing vehicle data or telematics setup. That means no new hardware, minimal disruption, and a quick setup - giving you the visibility you need, with none of the complexity. And with WEX behind you, expert support is always part of the package.
